

Henry Nuzum

President, US Ocean, LLC

Henry manages all aspects of US Ocean's business, which is comprised of a fleet of nine U.S. flag vessels (four pure car truck carriers (PCTCs) and five heavylift vessels) and associated logistics. All the vessels participate in the Maritime Security Program (MSP), making US Ocean one of the largest MSP operators. Each PCTC displaces over 20,000 tons and is capable of carrying up to 7000 automobiles. Each heavylift vessel has a crane capacity of 700-900 tons, making them particularly suitable for large out-of-gauge cargos and austere locales.

Previously, Henry managed business development for SEACOR Holdings in Dubai. As a civilian, he has worked in the Pentagon and on the House Armed Services Committee. In 2005, he worked for the International Republican Institute in Iraq. Following NROTC in college, Henry served aboard USS JOHN S. MCCAIN (DDG 56), leading a boarding party (he received a Navy Achievement Medal) and Tomahawk missile strikes (he received a Navy Commendation Medal) during two Arabian Gulf deployments. While in the Navy, he rowed for the U.S. in two World Championships and two Olympic Games, setting an American record in the Men's Heavyweight Double. Henry graduated from Harvard College, where he captained the Heavyweight Crew. He received an M.A. at Johns Hopkins SAIS. The Strategic Studies Institute and Armed Forces Journal have published his writing. A Houston resident, Henry is married with four children.
