

Cosema E. (Connie) Crawford, P.E.

Senior Vice President, Global Practice Leader, Rail and Transit, Louis Berger

Connie Crawford, Senior Vice President at Louis Berger, has over 30 years of public and private sector experience in the management, design and construction of major transportation programs. She served as Chief Engineer for MTA New York City Transit, where she was responsible for a \$2.25 billion annual capital program for subway and bus infrastructure. Previously, as Chief Engineer for the New York City Department of Transportation, she managed planning, design, construction and maintenance of the City's bridges and tunnels.

At Louis Berger, Ms. Crawford is responsible for the rail and transit market sector worldwide, with direct involvement on projects in the United States and Middle East, including most recently the Northeast Corridor Maglev Train.

Ms. Crawford holds master's and bachelor's degrees in engineering from Princeton University, where she has also taught. She is a licensed professional engineer and involved in professional organizations such as the American Public Transportation Association (APTA), Women's Transportation Seminar (WTS), The Moles, the American Society of Civil Engineers (ASCE), FIRST Robotics, and the Transportation Diversity Council (TDC) for which she is the founding chair. She has authored and presented papers on engineering topics, and is the recipient of a number of industry recognitions.
