

Saburo Takeuchi

General Manager -Policy Research &
Government Relations
Next Generation Energy Business Group
Mitsubishi Corporation

Saburo Takeuchi assumed the role of General Manager -Policy Research & Government Relations for the newly formed Next Generation Energy Business Group of Mitsubishi Corporation on April 2023. Based in Tokyo, Saburo manages research activities for global and domestic public policy relating to decarbonization and climate change as well as engagement with various government agencies.

Saburo has been with Mitsubishi Corporation since 1995 and has led various cross border commercial initiatives in the metals & mining segment, enterprise level planning & strategy roles, public policy & geopolitical research, and government relations.

He was most recently Senior Vice President, Mitsubishi Corporation (Americas) and General Manager, Washington Office and lead specialized Washington-sourced research work on U.S. policies and global geopolitics within Mitsubishi Corporation.

Other prior roles in Mitsubishi includes secondment to BHP Mitsubishi Alliance (BMA) as Head of Business Development and Alliance Planning. BMA is the world's largest exporter of seaborne metallurgical coal based in Queensland Australia. As part of the executive leadership team of BMA, Saburo has led the development of comprehensive strategy review of BMA, divestments and acquisitions of number of mining assets.

He has also held roles in Mitsubishi's Corporate Strategy & Planning team, Secretariat for the Presidential Committee, Vice President for Mitsubishi's Australasian iron ore investments, and Assistant to the President, Iron Ore Company (IOC) Ore Sales, the largest exporter of iron ore in North America.
