

Travis Mason

Public Policy and Gov't Affairs
Google, Inc.

Travis G. Mason is a new member of Google[x]'s Project Wing engineering team but has spent the last 5 years focused on public policy issues facing Google's most innovative work in autonomous technology, renewable energy and nano-diagnostics. From smart contact lenses to self-driving cars, Travis works with regulators and industry leaders to advance next generation technologies.

Before Google, Mason work at Booz Allen Hamilton with government leaders at the Departments of Homeland Security, Defense and State. He graduated from the Maxwell School of Citizenship at Syracuse and was recognized as a Harry S. Truman Scholar, one of the country's most prestigious undergraduate awards. He earned his Masters from the University of Michigan and has also studied at Princeton University's Woodrow Wilson School of Public Policy and Harvard University's Kennedy School of Government as a Galbraith Scholar.
